

Our Vision: Milwaukee County will be a national leader in the prevention of falls in the adult population through community education, collaboration, and innovation

Milwaukee County Fall Prevention Coalition Resource Series

Social Isolation During COVID-19 Crisis

Background

- Over half of adults over the age of 60 are at risk of social isolation.
- Stay-at-home/shelter in place orders have resulted in additional older adults being socially isolated.
- Social isolation leads to decreased physical activity can increase fall risk.
- Older adults are unable to participate in community-based fall prevention programs which reduce both fall risk and social isolation as a result of the COVID-19 pandemic.

Practical Tips

- Have regular connections and conversations with others- family, friends and neighbors.
- Send letters, pictures and video messages to family and friends.
- Work with family and friends so that computers, tablets, and phones can be configured to stay connected (Face Time, Zoom, SKYPE, etc.).
- Engage in physical activity and participate in daily activities and routines.
- Engage in normal routines whenever possible by using technology to access church services, exercise classes, or even museum tours.

Electronic Resources:

[Friendship Line \(Institute on Aging\)](#) – Crisis intervention and non-emergency hotline for emotional support calls

[Friendly Callers \(Milwaukee County Department on Aging\)](#) Friendly calls to older adults who feel isolated

[Happy](#) - Free app providing emotional support 24/7
